

Mini Grant Summary Report

Name: Jodie Smith
Date: 5/20/09

Division: Special Education
Contact Telephone: 464-6363
Email : jsmith@gw.neric.org

Project Title: Picture This

Project Code: For Office Use Only

Results Narrative (Describe what you had hoped to have achieved, what you did achieve, any challenges, and what you might do differently next time)

The plan was to design life skill posters designed by students featuring students to be hung in the classrooms to remind students to use their problem solving skills, flexibility skills, organizational skills and teamwork. The life skill posters are completed with students working on more posters to supplement the set. A set will be hung in the social work area. Each classroom will also receive posters in the high school wing. Some posters were designed with the teacher in mind and others will be able to pick from the original selection. The challenges were teaching students to use the shutterfly site and having patience to down load the pictures and then upload plus edit. We did finish a culminating mural of the students orienteering at Grafton Park with the photos taken from the trips. I wanted to paint the mural in February but do to an illness the artist wasn't available until May. I think I would use a computer lab next time so we could generate the posters faster.

Results Data (Present any data collected through the project)

How was the project disseminated?

I contacted Christine Carpenter and wrote up the information on the minigrant posters and she visited Maywood photographing the mural and some students who worked on the mural. In the Fall, she said she would return and we would do an article with the students with the posters hung.

Please show an accounting of the expenditures.

Laminating \$20.00
Shutterfly Site \$419.85
Artist Fee \$400.00
Frames \$50.24/12.94
